University of Alberta

A winter run across campus

The University of Alberta is one of Canada's senior universities, having accepted its first class of 45 students in 1908. Since then, it has grown into a community the size of a small city, with a student, faculty and staff population close to 40,000. Graduate students choose from 75 master's programs and 62 doctoral programs from 75 Departments and Faculties.

The University of Alberta has earned an international reputation in such diverse fields as chemistry, diabetes research and Ukrainian studies, and is highly regarded nationally for its work in rehabilitation medicine, biochemistry, northern studies and drama. In recent years our graduating students in medicine and pharmacy have consistently achieved top scores in national examinations.
